

“

My 3 Element SteppIR 20m-6m Yagi has been a great addition to my antenna arrangement. I purchased my SteppIR 6 years ago and have had exemplary performance from it! I have worked DXCC on every band except 60 M. I have DXCC on Phone, CW, and digital. My favorite option is the ability to go 180° in a matter of seconds – that has saved me many turns of the rotor along the way!
