

AA4MJ

I have had my Steppir BigIR vertical for over four years and it is and always has given me outstanding performance. Putting it together was somewhat of a challenge, which I actually enjoyed, and with the help of SteppIR customer service, I put it together and it's working fine. With the BigIR, I have full coverage of the 6, 10, 12, 15, 17, 20, 30 and 40 meter bands. I have not had any problems with the antenna since I purchased it!
