

“

I have been tracking Steppir ever since it first came out. I made an order back in 2019 and to this day the DB-18 SteppIR is still working as designed.

I am very pleased with the performance as in my opinion, the DB-18 antenna performs more like a 4 element yagi than a 3 element, on 20m-6m. On 40m, the DB18 has 2 elements and a SWR of 1:1 everywhere on the band. And oh yes, there is great front to back!

”
