

“

I have had my DB-18E up for about 4 ½ years, to date it is the best antenna I have ever used.

I have had several other multi-band beams up – Hy-Gain TH-6 and TH-7 and a KLM KT-34XA on 32 foot boom.

The DB-18E seems to outperform all of them! If I can hear them, I can work them ...

Being on a city size lot (1/2 acre), you get the most bang for your buck with a SteppIR and the Yagi is especially great on 30m and 40m!
