## IT'S NOT A CONTROLLER, IT'S AN OPTIMIZIR!

The days of using a "controller" are over. Imagine having the ability to select an antenna that is optimized for maximum gain, maximum front-to-rear or a combination of the two... at a click of a button!

- Create your own custom antenna models using 3rd party software such as AutoEZ, then download to your OptimizIR via mini SD card
- Antennas are optimized for normal direction, bi-directional and 180 degree modes
- Create antenna models for multiple SteppIR antenna products (Yagi, Vertical, Dipole) on a single controller
