Non-Powered Portability Also Available! Check Out Our **CrankIR Vertical**

STEPPIR VERTICAL AND DIPOLE ANTENNAS TAKE YOU ON THE ROAD, WITH POWER AND PERFORMANCE

20-6m Dipole

The 20m-6m dipole is arguably our most portable antenna. The dipole is simple to install, weighs a total of 15 lb and consists of two telescoping poles and an EHU. Length when operating is 36 ft. The dipole is portable and easy to install, but make no mistake, this antenna is a full-sized performer. There is no substitute for being able to tune the antenna to the exact length needed on all frequencies within it's range.

Small IR

Big IR

The BigIR and SmallIR verticals are the only true 1/4 wave continuous coverage antennas available for the HF bands. Being able to adjust the length of the element allows the Steppir vertical to be mounted nearly anywhere and still provide a good match to your transceiver. The BigIR stands 32 ft high and covers 40m-6m continuously; The SmallIR stands 18 ft high and covers 20m-6m continuously. Optional coils are available for frequency coverage up to 80m. Radials are necessary with all 1/4 wave verticals.
