OptimizIR 2.0 Diablo Firmware Release Notes

- Firmware Version: 1_01_000

Released: 07/23/2025

This version was released to allow the feature of the controller to be used remotely when connected to a computer. See page 40 of the OptimizIR 2.0 User Manual

- Firmware Version 1_01_002

Released: 10/22/2026

Allows access to the IR2 Folder for the user to be able to drag and drop saved antenna models made in the Create/Modify Menu. See page 36 of the OptimizIR 2.0 User Manual.

This version also fixes a bug in the Create/Modify Menu that wouldn't allow the Save button to work. You can now just press Save when making adjustments in the Create/Modify Menu and the new value will change in the Saved row.
